

**Report of the Water Commissioners of  
The North Raynham Water District  
May 15, 2025**

**To the Citizens of the North Raynham Water District  
The Commissioners of the North Raynham Water District respectfully submit the following report of the operation and financial statement.**

Zero new services were installed giving the district 1428 active services.

The district pumped a total of 122.243 million gallons of water during 2024.

The Treasurer's report shows the district to be in sound financial condition. This has been confirmed by the independent auditor's report from Marcum Accountants LLP for the Fiscal Year 2024.

The System Development and the District's Money Market Accounts, Certificates of Deposits and Capital Savings Accounts have yielded a total of \$24,720.00 in interest for Fiscal Year 2024.

The System Development Fees generated \$4,500.00 for the Fiscal Year 2024.

**District Annual Water Quality Reports**

The annual water quality reports will be mailed to each resident by the required Department of Environmental Protection (DEP) July 1st deadline.

**Major Infrastructure Changes**

The district is continuing to move forward with a major water main upgrade on the west side of Britton Street to King Philip Street in anticipation of a new water filtration plant. The contract was awarded last fall and the construction will begin in the spring of 2025. The district did secure the ARPA Grant and received \$395,000.00 to go toward the project.

**New Meter Replacement Program**

The district is continuing a system wide meter replacement program, installing the new radio read meters. District employees will be going door to door asking residents to allow entry to replace the old-style meters. There is no charge for this change out. **Please call for an appointment @ 508-824-0520.** The District has replaced over 19 meters during 2024 bringing the total number of meters replaced to 1,309 which represent 92% of the residential accounts. This increases the accuracy of water readings which helps to reduce the districts unaccounted for water and lowers the tax rate due to more accurate consumption billing

**Website**

The district is pleased that the website for the North Raynham Water District [www.nrwd.org](http://www.nrwd.org) has been a great success. A recent upgrade was made to the site. Information regarding rates, water conservation and other important town links has been accessed, proving the site is very user friendly. The district has on line payments available just click on: **On Line Payment** on our website.

In closing, the Commissioners want to take this opportunity to thank all of you for making this District a success.

Respectfully Submitted,

---

William D. Lewis -Chairman
